ISO A paper sizes

The A-series consists of a logical set of paper sizes that are defined by the ISO 216 standard. The height/width ratio remains constant (1:1.41) for all sizes. This means you get the A1 size by folding an A0 paper in two along its shortest side. Then fold the A1 size in two to get an A2 size paper, and so on. A-sizes are used to define the finished paper size in commercial printing: A4 is for office documents and brochures, A5 is often used for booklets and leaflets, and A6 is often used for postcards.
